EDUCATION

B.Tech in Computer Science and Business Systems
Vellore Institute of Technology – Andhra Pradesh, India
2024 – 2028 (Expected)
CGPA: 9.38 / 10 (as of Semester 3)

Intermediate (Class XII), BIEAP
Sri Chaitanya College of Education, Vijayawada, India
Year of Completion: 2024
Grade: 97.5%

High School (Class X), CBSE
Veeramachaneni Paddayya Siddhartha Public School, Vijayawada, India
Year of Completion: 2022
Grade: 96.2%

SKILLS

Programming Languages: C, C++, R
Web Basics: HTML5, CSS
Tools: Git, GitHub, VS Code, Arduino IDE, RStudio, MySQL
Concepts: Data Structures and Algorithms, Database Fundamentals, Basic Statistics and Probability, Linear Algebra, Discrete Mathematics

PROJECTS

Dynamic Wireless Charging System for Electric Vehicles (EV)

This project explored a prototype concept for dynamic wireless power transfer, where electric vehicles can receive power wirelessly through inductive charging coils. The concept and design approach were developed collaboratively with the team.
Technologies Used: Arduino, C programming, wireless power transfer concepts.

- Collaborated with the team to develop the concept and design of the system
- Assisted in building the transmitter and receiver coil setup for wireless power transfer

- Worked with Arduino and basic C programming to control the prototype system
- Helped test and demonstrate the wireless charging prototype
- Studied the working principles of inductive wireless power transfer

FinanceVault – Personal Finance Management System

GitHub: https://github.com/KrishnaKoushik-T/Finance-Vault

FinanceVault is a prototype web application designed to help users store and manage personal financial records. The project was developed collaboratively with a small team using AI-assisted development tools (Google Antigravity) for rapid prototyping.

Tools and Services Used: Google Antigravity, Firebase, Google Cloud APIs.

- Collaborated with the team to formulate the core idea and main features of the application
- Worked on the frontend interface within the sandbox environment to structure user interaction
- Used AI-assisted tools to generate and refine parts of the application
- Tested the application workflow and studied how different components interact
- Learned how web applications integrate services such as Firebase and external APIs
