

Dear Hiring Manager,

I am excited to apply for the Software Developer Intern position at your company. I am a Computer Science student with a strong interest in full-stack web development and hands-on experience with the MERN stack (MongoDB, Express.js, React.js, and Node.js).

Although I do not have professional work experience yet, I have built several personal projects that have helped me develop practical skills in frontend development, backend development, database management, API integration, and problem-solving. Through these projects, I have gained experience in designing and developing complete web applications from scratch.

I am also actively improving my programming skills through Data Structures and Algorithms practice and by learning industry-relevant technologies. I enjoy solving challenging problems and continuously expanding my technical knowledge.

I am eager to apply my skills in a professional environment, learn from experienced developers, and contribute to meaningful projects. I am a quick learner, highly motivated, and committed to continuous improvement.

Thank you for considering my application. I would appreciate the opportunity to discuss how I can contribute to your team while growing as a software developer.

Sincerely,

Balaji
